

Whole school Disney day

Thursday 18th January 2024

EYFS

EYFS began the day in collective worship where they were able to see the whole school dressed up. The children learnt that Walt Disney was the founder of the Disney. During phonics the children used their phonics to write the word 'piglet'. In their afternoon learning EYFS drew Mickey Mouse. They all persevered and the final results are all individual and unique.

YEAR 1

Year one based their Disney day around the film 'The Jungle Book'. The children worked together to create a jungle inspired picture, they considered which shapes would be the most suitable for the characters. In the afternoon year one produced some beautiful artwork, they used the skills previously learnt to create a gradient for a sunset background. The children then considered the different materials that could be used for the trees and vines, they decided that tissue paper would be best to create a realistic 3D effect. The final results looked fantastic!

YEAR 2

Year 2 have had an incredibly creative and engaging Disney themed day, learning about the film Moana. In the morning, the children created their own story based on the crab, Tamatoa. Together, they explored how he gained such riches and wrote about his untold story. Later, they created a fact file about sea turtles. In the afternoon they created flower leis using card, straw and string.

YEAR 3

Year 3 explored Disney themed statistics in maths, creating pictograms and bar charts of the classes favourite Disney films. During English, the children worked with a partner to create a non-chronological report about a different deep sea animal that may have been found with Nemo and Dory. After researching and writing their reports, they created chalk pastel art of their animal ready to display.

Year 4

Year 4 really enjoyed learning about Africa and 'The Lion King.' They researched facts about lions and created beautiful lion posters. In PE, the children enjoyed moving like animals to climb the gymnastic equipment. They also used their geography skills to find out where lions can be found.

Year 5

Year 5 explored the themes of the Disney/Pixar classic 'A Bug's Life'. In the afternoon, they linked their work to science, exploring the parts of an insect, then creating their own hybrid species.

Year 6

Year 6 celebrated Disney Day learning about penguins. Inspired by video clips from the Disney Nature penguin documentary, we wrote descriptions of Adelie penguins diving, sliding and huddling together on the Antarctic ice. In readiness for our evolution and inheritance topic after half-term, we studied the characteristics of penguins to identify how they have adapted to survive in such cold temperatures and how they have evolved over million years into the penguins that we are familiar with today.
