

Key Vocabulary

storyboard	A storyboard provides the reader with an outline of a project.
script	A computer script is a list of commands.
dialogue	This shows two or more characters as conversing.
soundtrack	Music used in videos.
recording	A motion picture made through photographing.

Key Facts

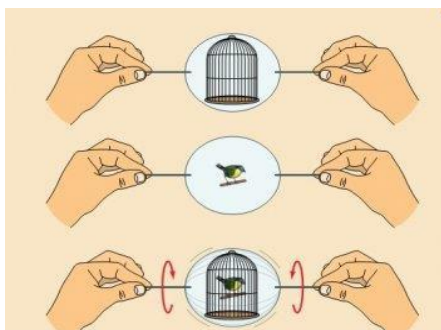

- Filming began in the late 19th century where films were in black and white and lacked audio. The first colour films were introduced in the 1930's.
- By the 1980's home video recorders became popular and in the 1990's these started to be shared on the internet.
- Early methods of filming used tape, which were expensive, low quality and could not film a lot of footage. Today, we use digital devices and hard drives to film in 8K resolution, which can hold tremendous amounts of video and audio data.

Key Questions

- What is video?
- What are the important elements in creating video?
- How do you share a message through a video?
- How do we record video?
