

Year 2 – The Human Body

How do I grow?

Key Vocabulary

toddler	A young child who is learning to walk or who has recently learnt to walk.
teenager	A young person between the ages of 13 and 19.
species	A group of living things that are able to have babies.
reproduce	The act of making and giving birth to new offspring, or children.
female	The part of the species that usually carries and gives birth to babies.
male	The other half of a species that fertilises the eggs of a female to create a new life.

Key Facts

- Human babies develop inside their mothers for 9 months.
- Medicines are types of drugs, so not all drugs are bad.

Female changes

Medicine

Key Questions

What is a life cycle?

What are the stages of human growth?

What are drugs and medicines?

Cross Curricular Learning

Science - animals including humans

Learning Journey

My body is growing

- To explore the human life cycle.
- To understand that animals, including humans, have offspring and they grow into adults.
- To understand how humans grow.
- To name the stages of human development.

Adapting to change

- To discuss how to manage feelings and that we all feel differently about certain situations
- To recognise when we need help with feelings, and know who to ask.
- To discuss our feelings about moving to a new class and having a new teacher

Year 3

Vaccinations and disease
My body, your body

Year 1

My body belongs to me
