

Key Vocabulary

sight	Your eyes let you see all the things around you
hearing	Your ears let you listen to all the things around you
touch	Your skin gives you the sense of touch
taste	Your sense of taste comes from your tongue
smell	You smell using your nose. Your nose can tell if things smell nice or not nice

Key Facts

- Your brain tells you what sounds you hear and what you can see.
- By touching something you can tell if something is warm, cold, smooth or rough. Try doing this with your eyes closed, does it make a difference?
- When tasting you can tell if something tastes bitter or sweet.
- When parts of our body aren't working, we can go to the doctor's, optician's or dentist for help.

Key Questions

- Can you name the different parts of the human body?
- Which parts of the body work with the five senses?
- What would it be like if we didn't have one of our senses?
- When different parts of our body aren't working who do we seek help from?
- Do we use more than one part of our body for carrying out different tasks like walking, running, climbing?
